

Proper Mask Fitting & Care Tips

Appearance

~ If your mask has any creases, stuff with tissue paper and very gently warm with blow dryer on low heat. While mask is still warm, straighten out any creases or folds. Leave paper in mask unit completely cool.

Customizing Fit

~ If your mask is fitting loosely away from eyes, we recommend adding tissue or foam in appropriate places inside of mask to bring closer to eye holes for better vision.

Cleaning

~ After wearing, a warm damp cloth may be used to clean inside of mask.

Storing

~ Make sure mask is completely dry before stuffing it with tissue paper. This will help the mask maintain its shape. Store in plastic bag in area with normal inside temperatures. No extreme conditions like direct sunlight or excessive heat or cold.
